

MS Project Download Guide

The MS Project software can be downloaded from MS Azure website at the link:

<https://azureforeducation.microsoft.com/devtools> by following the steps below:

- (1) Click the Sign In button in the Azure page which prompts the GSU Office 365 login page
- (2) Enter your GSU campus ID (xxxxx@student.gsu.edu) and password and complete the Duo multifactor authentication
- (3) After completing the GSU login, you should land on the Azure Education home page as shown in the screenshot below. Click the Software link on the left panel to list all software available to download
- (4) Find the MS Project software in the list and follow the instruction there to download. If it listed multiple versions, I would suggest you download the latest version of Project. (There are many other software tools you may also be interested to download.)
- (5) Click the View Key button in the download page to view the product key for its installation.

The screenshot shows the Microsoft Azure Education Software page. On the left, the 'Software' link in the navigation pane is highlighted with a red box. The main content area displays a list of software products. Two products are highlighted with red boxes: 'Project Professional 2021 - DVD' and 'Project Professional 2019', both categorized as 'Productivity Tools'. On the right, a detailed view for 'Project Professional 2019' is shown. It includes a description, operating system (Windows), product language (English), and system architecture (64 bit). A red arrow points to the 'View Key' button, with the text 'Click it to get the product key' next to it. At the bottom of the details panel, there are 'Download' and 'Cancel' buttons.

Project Professional 2019
Project Professional 2019 enables you to deliver projects successfully by keeping your projects, resources, and teams organized and on track. Easily and efficiently plan projects, track status, and collaborate with others from virtually anywhere. You can use real-time communications and instant messaging enabled within your project plan via Skype for Business and also easily sync Project schedules and plans with Project Online and Project Server 2019. Skype for Business, Project Online, and Project Server 2019 are sold separately.
